Clinical Education
Consultant

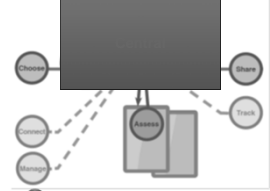

Q-interactive

Digital platform for individually-administered tests consisting of two primary components

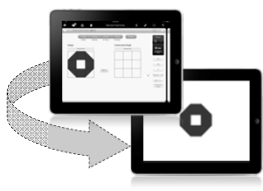

CENTRAL:

Browser-based function for generating client profiles, building test batteries, creating assessment sessions, and sharing results.

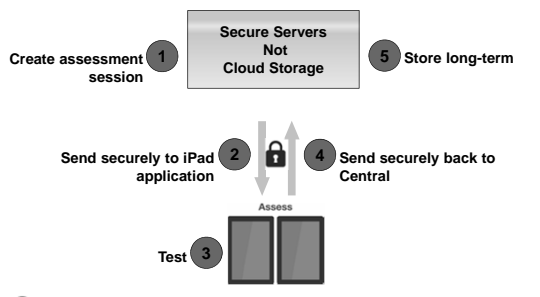

ASSESS:

Application that lets an examiner administer a test via two tablets connected by Bluetooth.

How Q-interactive Works

1 Create assessment session

2 Send securely to iPad application

3 Test

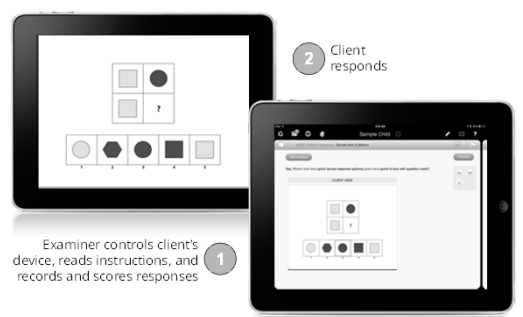

4 Send securely back to Central

5 Store long-term

Secure Servers
Not Cloud Storage

Testing in Assess

1 Examiner controls client's device, reads instructions, and records and scores responses

2 Client responds

Available tests

Measures of ability, memory, achievement, executive functioning, language and other neuropsychological constructs in both child and adult populations

WAIS-IV, WISC-V, WPPSI-IV, WISC-V Spanish
WIAT-III, KTEA-3
WMS-IV, CVLT-C, CVLT-III, CMS*
D-KEFS, NEPSY-II*, RBANS Update
CELF-5, PPVT-4, GFTA3, KLP3, GFTA3 Spanish

*Partial

iPad requirements

- Supported models will work with Q-interactive, but may be more likely to experience performance issues. "Recommended" models will result in the best experience and have the longest life span.
- Not supported models, due to psychometric impacts of displaying stimuli on a larger or smaller screen are unknown

	Practitioner Device			Client Device

Accessories

- One stylus
- Cases are recommended
- Anti-glare screen covers

Q-interactive®

Pearson

Test Item Screen

Platform Security

Q-interactive addresses security on three fronts

1 On Device

Device protected with complex passwords and mobile device management

Application encrypted and protected using complex passwords

No client data transferred via Bluetooth

Pearson

How is data secured?

- Security compliance with the standards established in the HIPAA and FERPA Security Regulations and in accordance with the HITECH Act applicable to Business Associates.
- All transfers to or from the web application to the tablet are automatically encrypted, using industry best practices.
- Client data is transferred from the tablet, using a secure connection, and stored in an encrypted Pearson database.
- A variety of administrative, physical, and technical safeguards are in place on Q-interactive to protect your personal data.

Pearson

Test Item Screen

Platform Security

Q-interactive addresses security on three fronts:

2 Data Transfer

Secure Servers

Assess

TLS 1.2 encryption protects data while being transferred from Central to Assess. This is the same best in class technology used in other industries such as banking and e-commerce.

Pearson

Test Item Screen

Platform Security

Q-interactive addresses security on three fronts:

3 Storage

Secure Servers

1. Data stored and backed up in a secure Savvis facility with access to authorized personnel only
2. Data protected using Oracle's Transparent Data Encryption
3. Data can be accessed by Database Administrator only, activity logged for auditing

Components of Assess

Q-interactive®

Practitioner **Examinee**

Pearson

Q-interactive provides efficiencies

- Save time with helpful tools that allow rapid capture and on-the-fly scoring
- Improve productivity by eliminating time spent on gathering materials, entering scores etc.
- Achieve greater accuracy in administration and scoring
- Obtain rich data which lead to rich insights
- Access feedback quicker to interpret findings sooner, probe deeper or more broadly
 - Add subtests on the fly
- Enjoy the convenience: its portable, familiar, and easy to use

Pearson

Equivalence Studies To Date

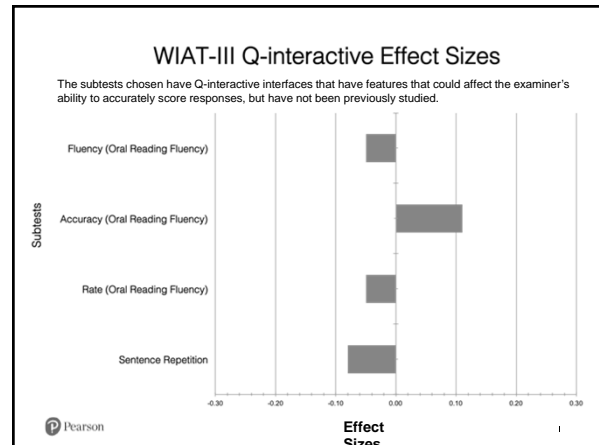

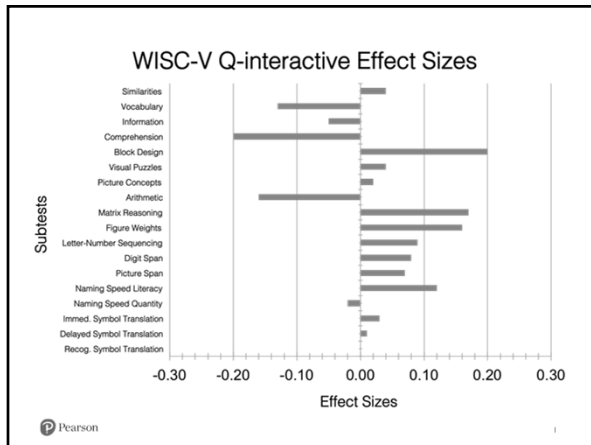

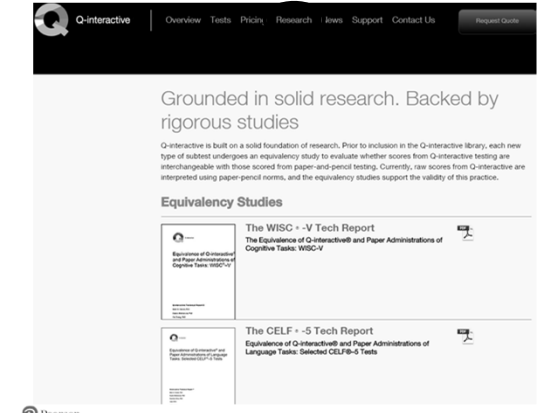

- 100 subtests studied, with over 1,500 examinees between the ages of 2 and 77
- 97 of the 100 subtests had effect sizes of 0.20 or less

Equivalent Groups   

Test/Retest     

Dual Capture

Overview Tests Pricing Research News Support Contact Us Request Quote

Grounded in solid research. Backed by rigorous studies

Q-interactive is built on a solid foundation of research. Prior to inclusion in the Q-interactive library, each new type of subtest undergoes an equivalency study to evaluate whether scores from Q-interactive testing are interchangeable with those scored from paper-and-pencil testing. Currently, raw scores from Q-interactive are interpreted using paper-pencil norms, and the equivalency studies support the validity of this practice.

Equivalency Studies

- The WISC - V Tech Report
The Equivalence of Q-interactive® and Paper Administrations of Cognitive Tasks: WISC-V
- The CELF - 5 Tech Report
Equivalence of Q-interactive® and Paper Administrations of Language Tasks: Selected CELF-5 Tests

Pearson

Clinical Studies on WISC-V

Clinical studies conducted with control group matched samples for

- Autism
- ADHD
- LD
- ID

Pearson

Clinical results on WISC-V

Samples in the Q-i matched-control studies

Clinical Group	N	Age	Gender (% Male)	Ethnicity (% Caucasian)
Intellectual Disability	22	11.8 (3.2)	63.6	59.1
Gifted and Talented	24	11.5 (2.9)	54.2	70.8
Autism	30	11.6 (2.9)	90.0	53.3
ADHD	25	10.5 (2.9)	64.0	64.0
Learning Disability	24	12.2 (3.1)	62.5	87.5

25+ Users	\$125		

1

Pricing - Usage

Pay As You Go - Billed Monthly	Cost Per Subtest
Academic Subtests (WIAT-III & KTEA-3)	\$0.75
Comprehensive Assessments (e.g., CELF-5, CMS, D-KEFS, KLP-3, NEPSY-II, WISC-V, WMS-IV, & WPPSI-IV)	\$1.50
Single Large Assessments (CVLT-C, CVLT-II, GFTA-3, PPVT-4 & RBANS)	\$4.50
Prepay Annually	Cost Per Subtest
<i>You should estimate your annual subtest usage based on the administration history for all users in your account. Note that the WIAT-III and KTEA-3 subtests count as .5 subtests, and the CVLT-C, CVLT-II, GFTA-3, PPVT-4 and RBANS are the equivalent of 3 subtests.</i>	
1-750 Subtests	\$1.50
751-5000 Subtests	\$1.25
5001+ Subtests	\$1.00
